

Creative Task

This month is National Smile Month - where we think about keeping our teeth, mouth and gums really healthy!

Task 1 - Poster

Create a poster reminding people how important it is to brush their teeth and look after their mouths. What are good/bad foods for teeth? You might even want to write instructions on how to brush your teeth or even record a video for young children teaching them to brush their teeth.

Task 2 - Design your own toothpaste

- Design the box and tube - what will your toothpaste be called? Will it have a special character to encourage children to brush their teeth? Will it have a special job? Whiten your teeth? Sensitive teeth?
- Optional - you may even want to make your own toothpaste like we did in class - using the toothpaste invention activity sheet to help

Extra task: Could you create a 3D model of the mouth? Showing all the different teeth and parts of the mouth? Could you use scrap material or playdoh?
